Dear Dr. Lauten,

I want to thank you from the bottom of my heart for saving my dog's life. Snuggles was getting sick every other day with vomiting, eating grass and just not eating her food. She was diagnosed with Irritable Bowel Syndrome, but I already knew she had gluten sensitivity (Celiac Disease) and therefore had her off of all gluten.

What I did not know was that the raw food diet that she was on had too much fat in it and was making her ill. You not only found the correct food for her which stopped her stomach problems but you gave me so much moral support. I was frantic and you reassured me and calmed me down and held my hand long distance.

I will always be grateful for your expertise and your kindness. Thank you for saving me and my dog, Snuggles.

Fondly,

Marlene Crosby and Snuggles
