

Lucy, a Shar Pei, was diagnosed with end-stage renal failure in April 2010; she had less than a month to live. I called Susan anyway, it is now October. She has two vets, a specialist and a regular vet. They cannot believe she is still alive, much less running and playing. I believe in Susan so much that I would personally recommend her to anyone. My email is pam@dbswebsite.com

Thank you Susan for giving our family hope that was once lost.
